

2 Days Workshop Business Intelligence with Power BI

This two-day workshop is designed to equip professionals with analytics skills to develop meaningful insights from their data for informed decisions making. Do more with less using MS Power BI and turn data into opportunity with this data cleansing, analysis and visualization tool. This course will cover key concepts of analytics and Business Intelligence with hands-on practice of MS Power BI and understanding of the ecosystem that makes it a formidable and leading tool. Power BI can help reduce cost, complexity and risks with an analytics platform that scales from individuals to the organization as a whole. You can find and share meaningful insights with hundreds of data visualizations, built-in AI capabilities, Excel integration and pre-built and custom data connectors in MS Power BI.
