

2 Days Workshop

VISUAL ANALYTICS WITH TABLEAU

F2F, NIBAF ISLAMABAD

21-22 NOVEMBER 2022

9:00AM-5:00PM

Program Description

Tableau is known for taking any kind of data and turning it into actionable insights with efficiency and ease. Named a leader in the Gartner Report for Analytics and Business Intelligence Platforms, this powerful drag-and-drop tool is used in Business Intelligence to derive insights from data, create interactive dashboards, real-time data analysis, prepare and analyze large data-sets, create no-code data queries and get insightful meanings out of data. This two day workshop is designed to familiarize professionals with basic to intermediate functions of Tableau and will enable users in analyzing data and creating meaningful visuals and charts for better understanding of data.

MR. TARIQ AZIZ KHAN

Mr. Tariq Aziz Khan has been working with data analytics tools and techniques to build business intelligence solutions at S&P Global since 2018. With extensive experience in BI project delivery, Mr. Tariq Aziz has extensive knowledge of data analysis using frontend tools like Tableau and Power BI and languages of Python, SQL and R. His area of expertise include exploratory data analysis with specialization in Tableau, Tableau server management, data Modeling, data warehousing, Python (Pandas, NumPy), statistical analysis with R, Machine learning, Azure cloud data pipelines and Apache Spark.
