LEADERSHIP CODE

Strategy, Transformation and Governance

Artificial Intelligence (AI) is no longer a future concept, it is shaping strategies, redefining business, and influencing leadership decisions today. For senior management, the challenge is not only to understand AI but also to harness its potential responsibly while aligning with organizational goals. The two-day program "AI Leadership Code: Strategy, Transformation and Governance" is designed to equip current and future leaders with the strategic mindset, transformational tools, and governance frameworks needed to lead AI initiatives in modern organizations. During the program, participants will explore the transition from traditional to AI augmented leadership, aligning AI with institutional goals, governance challenges, and ensuring ethical and compliant AI implementation
