(per day per participant)

F2F, NIBAF PAKISTAN, KARACHI / ONLINE

ISACA's Certified in Risk and Information Systems Control® (CRISC®) certification demonstrates your IT risk management expertise. By taking a proactive approach, you will learn how to enhance your organization's business resilience, deliver stakeholder value and optimize risk management across the enterprise. This 5-day Instructor-led preparatory Course is conducted in Hybrid mode at NIBAF Karachi, and will be facilitated by ISACA's Accredited Trainers with Guest lectures/insights by Industry Subject Matter Experts.

Domain 1: Governance 26%

Domain 2: Risk Assessment 22%

Domain 3: Risk Response and Reporting 32%

Domain 4: Technology and Security 20%

**DOMAIN 1 – GOVERNANCE OF ENTERPRISE IT - 26%:** The governance domain interrogates your knowledge of information about an organization's business and IT environments, organizational strategy, goals and objectives, and examines potential or realized impacts of IT risk to the organization's business objectives and operations, including Enterprise Risk Management and Risk Management Framework.

**DOMAIN 2 – RISK ASSESSMENT - 22%:** This domain will certify your knowledge of threats and vulnerabilities to the organization's people, processes and technology as well as the likelihood and impact of threats, vulnerabilities and risk scenarios.

**DOMAIN 3 – RISK RESPONSE AND REPORTING - 32%:** This domain deals with the development and management of risk treatment plans among key stakeholders, the evaluation of existing controls and improving effectiveness for IT risk mitigation, and the assessment of relevant risk and control information to applicable stakeholders.

**DOMAIN 4 – TECHNOLOGY AND SECURITY - 20%:** In this domain we interrogate the alignment of business practices with Risk Management and Information Security frameworks and standards, as well as the development of a risk-aware culture and implementation of security awareness training.

**Day 5 – Revision and Assessment**
